March 26th, 2026

Hiring Manager
Dynasty Power Inc.
411 8 Avenue SW
Calgary, Alberta, T2P 1E3

Dear Hiring Manager,

I am writing to apply for the Junior Power Trader co-op position for the Fall 2026 term at Dynasty Power. I am an Electrical Engineering student at the University of Waterloo with a strong quantitative background and a growing interest in data-driven decision making within volatile market environments.

Through my internship at Graze AI, I worked extensively with large datasets, designing Python- and SQL-based processing systems to ensure data integrity across multiple platforms. I built complex Excel and VBA models to automate reconciliation, structured transformations, and performance tracking, often writing hundreds of lines of logic to handle edge cases and system inconsistencies. This experience strengthened my ability to think probabilistically, evaluate trade-offs, and design reliable systems under uncertainty.

Beyond implementation, I am particularly drawn to roles where analytical rigor directly informs real-time decisions. I have explored market data using Python to study price behavior, distribution characteristics, and risk-adjusted performance metrics. These projects deepened my interest in how statistical structure, volatility, and external variables influence pricing dynamics. I am motivated by environments where disciplined analysis, risk awareness, and clear communication are critical to performance.

Dynasty Power's exposure to major North American power markets and its emphasis on modeling, collaboration, and disciplined trading strongly appeal to me. I am eager to contribute through rigorous data analysis, continuous learning, and a high level of personal accountability in a performance-driven setting.

Thank you for your time and consideration. I would welcome the opportunity to further discuss how my quantitative skills, technical background, and motivation to grow in trading can contribute to your team.

Sincerely,
Saad Mir
